

## Principal Poisonous Plants of Canada (Classic Reprint)

Excerpt from Principal Poisonous Plants of Canada Sir, - I have the honour to transmit herewith the manuscript of Bulletin 39 of the Second Series, on Poisonous Plants. This bulletin has been prepared by Miss Faith Fyles, Assistant Botanist, and is profusely illustrated from drawings made by the author. These, with the many careful descriptions given of the various poisonous plants, make the bulletin a valuable one to those engaged in botanical studies. The main object in its publication, however, is to give the farmer and stock-raiser a means of recognizing and identifying such poisonous plants as may occur on his pastures and ranges. Symptoms of poisoning by these plants are also described and methods of treatment indicated. It is hoped that the bulletin will do much to lessen the present heavy annual loss among the various classes of live stock from the above cause. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
