

# Nova Europa: European Survival Strategy in a Darkening World

Given current demographic trends, European people will first become an outright minority in their own lands within the next thirty years. Thereafter, they will become a tiny minority, and shortly after that, will vanish completely under a flood of further immigration and miscegenation. Traditional political activity has failed to stem the tide, and the time has come to consider an alternative strategy which will preserve Europeans in the post-Western age. This book describes the steps required to attain a practical solution, namely a European ethnostate, divorced from white supremacy over others. Drawing upon history and two practical examples, the author forms an coherent argument for the creation of, at first, local European communities, and then eventually, the creation of a European ethnostate arising from the chaos of a Third Worldized globe. It includes detailed steps and territorial proposals. It is a positive, practical, answer to the crisis facing European man which might provide his salvation. Why is it that only the European people are under threat in this way? The answer is simple, and obvious: it is because all the other people of the earth have homelands, or heartlands, where they can maintain their racial integrity and identity, no matter what else happens elsewhere in the world. No matter how much the miscegenation process continues elsewhere, China will always be Chinese. Japan will always be Japanese. Africa will always be African. Why therefore, is there no European heartland, in which European people are a majority, and in which they have the inalienable right to maintain their racial identity and integrity? European people need a heartland, a homeland, just like any other people on earth. Contents Chapter One: The Premise Race Is Reality The Myth of European Colonial Debt The Legal and Moral Right to Self Determination Self Determination for Europeans Is the

Opposite of White Supremacism  
Case Study: India  
The Continued Existence of a Culture Is Dependent upon the Continued Existence of Its Founding People  
Case Study: The American Indians
