

The Dialogical Self: Meaning as Movement

Contemporary research in personality, social psychology, and sociology has renewed an interest in the self. This volume argues that the self may consist of multiple selves any of which may interact with each other in a dialogical fashion. The self is presented as a non-unitary embodiment that transcends the limits of individualism and rationalism. Beginning with a philosophic discussion of the self, this volume discusses the decentralization of the self in narrative psychology, the retreat of the omniscient narrator in literary sciences, the genesis of self-knowledge in children, and the concept of modern society as a multiplicity of collective voices.
